由于 ShareSDK2.0 与 1.0 的架构模式不相同，因此使用 1.0 的开发者如果要向 2.0SDK 进行升级需要参考以下变更内容并作出调整：

1、舍弃头文件 ShareConfig.h

2.0 中的对各分享平台信息的设置将放在应用初始化中进行配置。不需要再向 main.m 中加入 ShareConfig.h 头文件。

2、配置分享平台 App 信息。

2.0 除了需要调用 registerApp 方法对 SDK 进行注册外，还提供了一系列 connectXXXXX（XXXXX 代表平台名称）方法对每个平台进行应用信息配置，如：

```
//添加新浪微博应用
 [ShareSDK connectSinaWeiboWithAppKey:@"3201194191"
                           appSecret:@"0334252914651e8f76bad63337b3b78f"
                           redirectUri:@"http://appgo.cn"];
//添加腾讯微博应用
 [ShareSDK connectTencentWeiboWithAppKey:@"801307650"
                           appSecret:@"ae36f4ee3946e1cbb98d6965b0b2ff5c"
                           redirectUri:@"http://www.sharesdk.cn"];
```

3、新增 handleOpenURL 方法。

2.0中对于处理- (BOOL)application: openURL: sourceApplication annotation:方法提供了一个新方法。如下所示：

```
- (BOOL)application:(UIApplication *)application
         openURL:(NSURL *)url
         sourceApplication:(NSString *)sourceApplication
         annotation:(id)annotation
{
   return [ShareSDK handleOpenURL:url
           sourceApplication:sourceApplication
           annotation:annotation
           wxDelegate:self];
}
```

4、微信、QQ 集成方式改变。

2.0中不需要额外调用**WXApi**后者**QQApi**中的方法，这两个平台已经归类到 connect系列方法中。使用以下方式初始化：

```
//添加QQ应用
 [ShareSDK connectQQWithAppId:@"QQ0F0A941E" qqApiCls:[QQApi class]];
//添加微信应用
 [ShareSDK   connectWeChatWithAppId:@"wx6dd7a9b94f3dd72a"   wechatCls:[WXApi
class]];
```

（注：**WXApi.h**与**QQApi.h**和**1.0**版本一样需要进行导入）

5、类、属性、协议名称变更。

2.0中对部分类名称和协议名称进行了调整，详细请参考下面对照表：

1.0	2.0
ISSPublishContent	ISSContent
source（ISSUserInfo的属性）	sourceData（ISSUserInfo的属性）
ShareViewStyle	SSShareViewStyle
IShareViewOptions	ISSShareOptions
IAuthOptions	ISSAuthOptions
IPage	ISSPage
IClientToken	ISSCredential
IOAuthClientToken	ISSOAuthCredential
IOAuth2ClientToken	ISSOAuth2Credential

6、创建图片对象方式变更

2.0 版本中不再支持直接传入 UIImage 对象进行分享，需要以附件的形式传入内容对象中进行分享。创建附件对象可以通过下面接口：

```
+ (id<ISSCAttachment>)imageWithPath:(NSString *)path;

+ (id<ISSCAttachment>)jpegImageWithImage:(UIImage *)image
                              quality:(CGFloat)quality;

+ (id<ISSCAttachment>)pngImageWithImage:(UIImage *)image;
```

```
+ (id<ISSCAttachment>)imageWithData:(NSData *)data
                       fileName:(NSString *)fileName
                       mimeType:(NSString *)mimeType;
```

7、创建分享内容(ISSPublishContent)接口调整。

1.0版本中的多种构造分享内容（ISSPublishContent）接口已被舍弃，其中包括：

```
+ (id<ISSPublishContent>)publishContent:(NSString *)content
                       defaultContent:(NSString *)defaultContent
                       image:(UIImage *)image
                       imageQuality:(CGFloat)imageQuality
                       mediaType:(SSPublishContentMediaType)mediaType;

+ (id<ISSPublishContent>)publishContent:(NSString *)content
                       defaultContent:(NSString *)defaultContent
                       image:(UIImage *)image
                       imageQuality:(CGFloat)imageQuality
                       mediaType:(SSPublishContentMediaType)mediaType
                       title:(NSString *)title
                       url:(NSString *)url
                       musicFileUrl:(NSString *)musicFileUrl
                       extInfo:(NSString *)extInfo
                       fileData:(NSData *)fileData;

+ (id<ISSPublishContent>)publishContent:(NSString *)content
                       defaultContent:(NSString *)defaultContent
                       imageObject:(id<ISSImage>)imageObject;
```

2.0版本中引入新的创建分享内容接口：

```
+ (id<ISSContent>)content:(NSString *)content
        defaultContent:(NSString *)defaultContent
        image:(id<ISSCAttachment>)image
        title:(NSString *)title
        url:(NSString *)url
        description:(NSString *)description
        mediaType:(SSPublishContentMediaType)mediaType;
```

此方法的各个参数说明请参考ShareSDK.h中的注释说明。

8、创建授权选项（**ISSAuthOptions**）接口优化

    2.0中对授权选项进行了优化，协议名称由**IAuthOptions**更名为**ISSAuthOptions**并提供了授权视图的控制委托（需要实现**ISSViewDelegate**协议）。其函数申明如下：

```
+ (id<ISSAuthOptions>)authOptionsWithAutoAuth:(BOOL)autoAuth
      allowCallback:(BOOL)allowCallback
      authViewStyle:(SSAuthViewStyle)authViewStyle
      viewDelegate:(id<ISSViewDelegate>)viewDelegate
      authManagerViewDelegate:(id<ISSViewDelegate>)authManagerViewDelegate;
```

    1.0中创建授权选项方法已被舍弃：

```
+ (id<IAuthOptions>)authOptionsWithAutoAuth:(BOOL)autoAuth
                              authViewStyle:(AuthViewStyle)authViewStyle;
```

9、创建分享选项（**ISSShareOptions**）接口优化

    2.0 中对分享选项进行了优化，协议名称由 **ISSShareViewOptions** 更名为 **ISSShareOptions** 并提供了分享相关视图的控制委托（需要实现 **ISSShareViewDelegate** 或者 **ISSViewDelegate** 协议），其和 1.0 版本一样提供了三种创建方法：

```
+ (id<ISSShareOptions>)defaultShareOptionsWithTitle:(NSString *)title
        oneKeyShareList:(NSArray *)oneKeyShareList
        qqButtonHidden:(BOOL)qqButtonHidden
        wxSessionButtonHidden:(BOOL)wxSessionButtonHidden
        wxTimelineButtonHidden:(BOOL)wxTimelineButtonHidden
        showKeyboardOnAppear:(BOOL)showKeyboardOnAppear
        shareViewDelegate:(id<ISSShareViewDelegate>)shareViewDelegate
        friendsViewDelegate:(id<ISSViewDelegate>)friendsViewDelegate
        picViewerViewDelegate:(id<ISSViewDelegate>)picViewerViewDelegate;

+ (id<ISSShareOptions>)simpleShareOptionsWithTitle:(NSString *)title
        shareViewDelegate:(id<ISSShareViewDelegate>)shareViewDelegate;

+ (id<ISSShareOptions>)appRecommendShareOptionsWithTile:(NSString *)title
        shareViewDelegate:(id<ISSShareViewDelegate>)shareViewDelegate;
```

    1.0 中相关接口已被舍弃，其中包括：

```
+ (id<IShareViewOptions>)defaultShareViewOptionsWithTitle:(NSString *)title
                        oneKeyShareList:(NSArray *)oneKeyShareList
                        qqButtonHidden:(BOOL)qqButtonHidden
                        wxSessionButtonHidden:(BOOL)wxSessionButtonHidden
                        wxTimelineButtonHidden:(BOOL)wxTimelineButtonHidden;

+ (id<IShareViewOptions>)defaultShareViewOptionsWithTitle:(NSString *)title
                        oneKeyShareList:(NSArray *)oneKeyShareList
                        qqButtonHidden:(BOOL)qqButtonHidden
                        wxSessionButtonHidden:(BOOL)wxSessionButtonHidden
                        wxTimelineButtonHidden:(BOOL)wxTimelineButtonHidden
                        showKeyboardOnAppear:(BOOL)showKeyboardOnAppear;

+ (id<IShareViewOptions>)simpleShareViewOptionWithTitle:(NSString *)title;

+ (id<IShareViewOptions>)appRecommendShareViewOptionWithTitle:(NSString
*)title;
```

10、弹出分享菜单接口调整。

2.0版本中引入新的显示分享菜单接口：

```
+ (id<ISSShareActionSheet>)showShareActionSheet:(id<ISSContainer>)container
            shareList:(NSArray *)shareList
            content:(id<ISSContent>)content
            statusBarTips:(BOOL)statusBarTips
            authOptions:(id<ISSAuthOptions>)authOptions
            shareOptions:(id<ISSShareOptions>)shareOptions
            result:(SSPublishContentEventHandler)result;
```

第一个参数为显示菜单容器，已将1.0的iPhone与iPad版本容器整合到此参数中。通过调用此参数的方法可以设置iPhone或者iPad显示容器。
其余与旧版本接口意义相同。

1.0版本中相关接口已被舍弃，其中包括：

```
+ (void)showShareActionSheet:(UIViewController *)containerController
          shareList:(NSArray *)shareList
          content:(id<ISSPublishContent>)content
          statusBarTips:(BOOL)statusBarTips
          oneKeyShareList:(NSArray *)oneKeyShareList
```

```objectivec
          shareViewStyle:(ShareViewStyle)shareViewStyle
          shareViewTitle:(NSString *)shareViewTitle
          result:(PublishContentEventHandler)result;

+ (void)showShareActionSheet:(UIViewController *)containerController
          shareList:(NSArray *)shareList
          content:(id<ISSPublishContent>)content
          statusBarTips:(BOOL)statusBarTips
          oneKeyShareList:(NSArray *)oneKeyShareList
          autoAuth:(BOOL)autoAuth
          shareViewStyle:(ShareViewStyle)shareViewStyle
          shareViewTitle:(NSString *)shareViewTitle
          result:(PublishContentEventHandler)result;

+ (void)showShareActionSheet:(UIViewController *)containerController
          shareList:(NSArray *)shareList
          content:(id<ISSPublishContent>)content
          statusBarTips:(BOOL)statusBarTips
          oneKeyShareList:(NSArray *)oneKeyShareList
          autoAuth:(BOOL)autoAuth
          convertUrl:(BOOL)convertUrl
          shareViewStyle:(ShareViewStyle)shareViewStyle
          shareViewTitle:(NSString *)shareViewTitle
          result:(PublishContentEventHandler)result;

+ (void)showShareActionSheet:(UIViewController *)containerController
          shareList:(NSArray *)shareList
          content:(id<ISSPublishContent>)content
          statusBarTips:(BOOL)statusBarTips
          autoAuth:(BOOL)autoAuth
          convertUrl:(BOOL)convertUrl
          shareViewOptions:(id<IShareViewOptions>)shareViewOptions
          result:(PublishContentEventHandler)result;

+ (void)showShareActionSheet:(UIViewController *)containerController
          shareList:(NSArray *)shareList
          content:(id<ISSPublishContent>)content
          statusBarTips:(BOOL)statusBarTips
          convertUrl:(BOOL)convertUrl
          authOptions:(id<IAuthOptions>)authOptions
          shareViewOptions:(id<IShareViewOptions>)shareViewOptions
          result:(PublishContentEventHandler)result;

+ (void)showShareActionSheet:(UIViewController *)containerController
```

```
iPadContainer:(id<IShareContainer>)iPadContainer
shareList:(NSArray *)shareList
content:(id<ISSPublishContent>)content
statusBarTips:(BOOL)statusBarTips
convertUrl:(BOOL)convertUrl
authOptions:(id<IAuthOptions>)authOptions
shareViewOptions:(id<IShareViewOptions>)shareViewOptions
result:(PublishContentEventHandler)result;
```

11、弹出分享视图接口调整

2.0中引入的显示分享视图接口：

```
+ (void)showShareViewWithType:(ShareType)type
        container:(id<ISSContainer>)container
        content:(id<ISSContent>)content
        statusBarTips:(BOOL)statusBarTips
        authOptions:(id<ISSAuthOptions>)authOptions
        shareOptions:(id<ISSShareOptions>)shareOptions
        result:(SSPublishContentEventHandler)result;
```

1.0中相关接口已被舍弃，其中包括：

```
+ (void)shareContentWithType:(ShareType)shareType
        content:(id<ISSPublishContent>)content
        containerController:(UIViewController *)containerController
        statusBarTips:(BOOL)statusBarTips
        oneKeyShareList:(NSArray *)oneKeyShareList
        shareViewStyle:(ShareViewStyle)shareViewStyle
        shareViewTitle:(NSString *)shareViewTitle
        result:(PublishContentEventHandler)result;

+ (void)shareContentWithType:(ShareType)shareType
        content:(id<ISSPublishContent>)content
        containerController:(UIViewController *)containerController
        statusBarTips:(BOOL)statusBarTips
        oneKeyShareList:(NSArray *)oneKeyShareList
        autoAuth:(BOOL)autoAuth
        shareViewStyle:(ShareViewStyle)shareViewStyle
        shareViewTitle:(NSString *)shareViewTitle
        result:(PublishContentEventHandler)result;
```

```
+ (void)shareContentWithType:(ShareType)shareType
        content:(id<ISSPublishContent>)content
        containerController:(UIViewController *)containerController
        statusBarTips:(BOOL)statusBarTips
        oneKeyShareList:(NSArray *)oneKeyShareList
        autoAuth:(BOOL)autoAuth
        convertUrl:(BOOL)convertUrl
        shareViewStyle:(ShareViewStyle)shareViewStyle
        shareViewTitle:(NSString *)shareViewTitle
        result:(PublishContentEventHandler)result;

+ (void)shareContentWithType:(ShareType)shareType
        content:(id<ISSPublishContent>)content
        containerController:(UIViewController *)containerController
        statusBarTips:(BOOL)statusBarTips
        autoAuth:(BOOL)autoAuth
        convertUrl:(BOOL)convertUrl
        shareViewOptions:(id<IShareViewOptions>)shareViewOptions
        result:(PublishContentEventHandler)result;

+ (void)shareContentWithType:(ShareType)shareType
        content:(id<ISSPublishContent>)content
        containerController:(UIViewController *)containerController
        statusBarTips:(BOOL)statusBarTips
        convertUrl:(BOOL)convertUrl
        authOptions:(id<IAuthOptions>)authOptions
        shareViewOptions:(id<IShareViewOptions>)shareViewOptions
        result:(PublishContentEventHandler)result;
```

12、无界面分享接口调整

2.0中将无界面分享划分为两个接口，一个为一键分享接口（即旧版中的无界面分享接口）和单个平台分享接口。其方法声明分别如下：

```
+ (void)oneKeyShareContent:(id<ISSContent>)content
        shareList:(NSArray *)shareList
        authOptions:(id<ISSAuthOptions>)authOptions
        statusBarTips:(BOOL)statusBarTips
        result:(SSPublishContentEventHandler)result;

+ (void)shareContent:(id<ISSContent>)content
        type:(ShareType)type
        authOptions:(id<ISSAuthOptions>)authOptions
```

```
            statusBarTips:(BOOL)statusBarTips
            result:(SSPublishContentEventHandler)result;
```

1.0中相关接口将被舍弃，其中包括：

```
+ (void)shareContentWithShareList:(NSArray *)shareList
              content:(id<ISSPublishContent>)content
              statusBarTips:(BOOL)statusBarTips
               result:(PublishContentEventHandler)result;

+ (void)shareContentWithShareList:(NSArray *)shareList
              content:(id<ISSPublishContent>)content
              statusBarTips:(BOOL)statusBarTips
              autoAuth:(BOOL)autoAuth
              result:(PublishContentEventHandler)result;

+ (void)shareContentWithShareList:(NSArray *)shareList
              content:(id<ISSPublishContent>)content
              statusBarTips:(BOOL)statusBarTips
              autoAuth:(BOOL)autoAuth
              convertUrl:(BOOL)convertUrl
              result:(PublishContentEventHandler)result;

+ (void)shareContentWithShareList:(NSArray *)shareList
              content:(id<ISSPublishContent>)content
              statusBarTips:(BOOL)statusBarTips
              convertUrl:(BOOL)convertUrl
              authOptions:(id<IAuthOptions>)authOptions
              result:(PublishContentEventHandler)result;
```

13、获取用户信息接口调整

2.0中对旧版获取用户接口进行了整合，提供了新的接口，其声明如下：

```
+ (void)getUserInfoWithType:(ShareType)shareType
           authOptions:(id<ISSAuthOptions>)authOptions
           result:(SSGetUserInfoEventHandler)result;

+ (void)getUserInfoWithType:(ShareType)type
             field:(NSString *)field
             fieldType:(SSUserFieldType)fieldType
```

```
                    authOptions:(id<ISSAuthOptions>)authOptions
                    result:(SSGetUserInfoEventHandler)result;
```

1.0中相关接口已被舍弃，其中包括：

```
+ (void)getUserInfoWithType:(ShareType)shareType
                    result:(GetUserInfoEventHandler)result;

+ (void)getUserInfoWithType:(ShareType)shareType
                    autoAuth:(BOOL)autoAuth
                    result:(GetUserInfoEventHandler)result;

+ (void)getUserInfoWithType:(ShareType)type
                uid:(NSString *)uid
                parameterType:(UserParamType)parameterType
                autoAuth:(BOOL)autoAuth
                result:(GetUserInfoEventHandler)result;

+ (void)getUserInfoWithType:(ShareType)type
                uid:(NSString *)uid
                parameterType:(UserParamType)parameterType
                authOptions:(id<IAuthOptions>)authOptions
                result:(GetUserInfoEventHandler)result;
```

14、关注用户接口调整

2.0中对关注用户接口进行了优化、旧版中只能够根据用户名称进行关注，新版接口中可以根据名称或者用户ID进行关注，通过设定filedType参数来进行设定。其声明如下：

```
+ (void)followUserWithType:(ShareType)type
                field:(NSString *)field
                fieldType:(SSUserFieldType)fieldType
                authOptions:(id<ISSAuthOptions>)authOptions
                viewDelegate:(id<ISSViewDelegate>)viewDelegate
                result:(SSFollowUserEventHandler)result;
```

1.0中关注用户接口已舍弃：

```
+ (void)followUserWithName:(NSString *)name
                shareType:(ShareType)shareType
                result:(FollowUserEventHandler)result;
```

```
+ (void)followUserWithName:(NSString *)name
            shareType:(ShareType)shareType
            autoAuth:(BOOL)autoAuth
            result:(FollowUserEventHandler)result;
```

15、已舍弃部分获取好友列表接口

2.0版本中舍弃的获取好友列表接口如下：

```
+ (void)getFriendsWithType:(ShareType)type
            pageNo:(NSInteger)pageNo
            result:(GetFriendsEventHandler)result;

+ (void)getFriendsWithType:(ShareType)type
            pageNo:(NSInteger)pageNo
            autoAuth:(BOOL)autoAuth
            result:(GetFriendsEventHandler)result;

+ (void)getFriendsWithType:(ShareType)type
            pageNo:(NSInteger)pageNo
            authOptions:(id<IAuthOptions>)authOptions
            result:(GetFriendsEventHandler)result;
```

16、获取/设置授权接口调整

2.0中对获取和设置授权接口进行了调整，其声明如下：

```
+ (id<ISSCredential>)getCredentialWithType:(ShareType)type;

+ (void)setCredential:(id<ISSCredential>)credential type:(ShareType)type;
```

1.0中相关应用已被舍弃，其中包括：

```
+ (void)setClientToken:(id<IClientToken>)token;

+ (id<IClientToken>)getClientTokenWithType:(ShareType)type;
```
